When it comes to losing stubborn fat, people are trying hard and still not being able to get desired results. Do you know what is holding you back from achieving great weight loss results? Sometimes, investing too much in dieting and exercising, still does not provide desired results, and it is really frustrating. There are a number of reasons and factors that are stopping you from losing excess body fat such as:

- **Overeating**
- **excess intake of sugar**
- **junk food**
- **Sedentary lifestyle**
- **mental disorders or emotional factors.**

These are the major issues that can prevent weight loss and leads to obesity. Obesity is a curse to human health. Being overweight is not an appearance issue, it is actually a major health disorder. It develops certain health conditions including diabetes, high blood pressure, high cholesterol levels, type 2 diabetes, coronary heart disease, stroke, metabolic syndrome, arthritis, and joint pain. These are the alarming health conditions that can deteriorate overall health and fitness. Fortunately, to cope with such health disorders and obesity, scientists and researchers have designed [Weight Crasher Keto Gummies](#).
