Rochelle Lieberstein Stern

ABSTRACT

Abstract: Are there evidenced-based, reviews, articles of scientific validity, and/or clinical studies that imply other actions, in addition to WHO, NIH, and CDC recommendations, which could help, safeguard, or improve immunity response while home with or without COVID-19? This may include anything that would be accessible via home items, mail online orders, food, or over-the-counter items in the drug store. This review is exclusively based on scientific literature or medical professional observation
