Abstract

Placenta formalin-fixed tissue blocks paraffin embedding at JAX Bar Harbor Histology Services.

- 1 Procedure addition between sample collection at Mayo Clinic and JAX Bar Harbor Histology Services processing:
 - 1.1 Samples were received from Mayo Clinic in 10% NBF on ice.
 - 1.2 Formalin was replaced with 70% Ethanol and left overnight at room temperature.
 - 1.3 Samples were shipped at room temperature to JAX Bar Harbor Histology Services for tissue processing and paraffin embedding (FFPE).
- 2 At JAX Bar Harbor Histology Services samples were embedded in paraffin (FFPE) according to: <https://dx.doi.org/10.17504/protocols.io.rm7vzj9z2lx1/v1>
