The purpose of this document is to act as a placeholder for a real safety protocol.

This safety protocol could describe general safety procedures and warnings for handling a certain material like a sample or an instrument.

I will want to refer to this safety document from a variety of protocols.

I might include an image in my real safety protocol. For example, here's an image of the Bruker 800 that I've entered using embed code that I retrieved from Box:

I might refer to a material using a component like the equipment component:

Avance III 600 MHz
nuclear magnetic resonance spectrometer
Bruker unknown
