DISCLAIMER – FOR INFORMATIONAL PURPOSES ONLY; USE AT YOUR OWN RISK

The protocol content here is for informational purposes only and does not constitute legal, medical, clinical, or safety advice, or otherwise; content added to [protocols.io](#) is not peer reviewed and may not have undergone a formal approval of any kind. Information presented in this protocol should not substitute for independent professional judgment, advice, diagnosis, or treatment. Any action you take or refrain from taking using or relying upon the information presented here is strictly at your own risk. You agree that neither the Company nor any of the authors, contributors, administrators, or anyone else associated with [protocols.io](#), can be held responsible for your use of the information contained in or linked to this protocol or any of our Sites/Apps and Services.

Before you start

- 1 In this step, I'll refer to the software that you need to use. I used the Software component to do this.

NMRBox [↗](#)

[source](#)

- 2 In this step, I'll refer to an image using embed code from Box.

- 3 In this step, I need to direct to to execute one of the following protocols depending on your context. Then you need to return to this protocol and continue with the next step. The two protocol options are hyperlinked below.

[Bogus data acquisition protocol II](#)

[Bogus Data Acquisition Protocol III](#)

- 4 Run the command displayed below, which is display with the command component.

Test copy code

```
scp -rp myfile
```
