ABSTRACT

Protocol for detection of ATP10B in rat and mouse brain tissue by Western blotting

DOI

dx.doi.org/10.17504/protocols.io.byhfpt3n

PROTOCOL CITATION

María Sanchiz Calvo, eduard.bentea , Veerle Baekelandt 2021. Western blot protocol for detecting ATP10B in mouse/rat brain. **protocols.io**

MATERIALS TEXT

Recipe for 100 mL 1x RIPA buffer:

- o 5 mL Tris pH 7.4
- o 1 mL Triton x100
- o 1 g Deoxycholate
- o 3 mL 5M NaCl
- o 200 µL 0.5M EDTA (pH 8.0)
- o 1 mL 10% SDS

Add water until 100 mL (MilliQ water)

Add protease and phosphatase inhibitors (Pi + PPi) right before use

Reagents used during Western blotting:

- o 6X SDS buffer
- o PageRuler™ Plus Prestained Protein Ladder
- o 3-8% NuPAGE™ Tris-Acetate gel
- o NuPAGE™ Tris-Acetate SDS Running Buffer
- o Trans-Blot® TurboTM PVDF Membrane
- o 5% milk powder dissolved in PBS-T 0.1% (PBS + 0.1% Triton-X100)
- o ATP10B HPA034574 (Sigma) primary antibody
- o Goat anti-rabbit HRP secondary antibody (Dako)
- o ECL Prime chemiluminescence kit (GE Healthcare)

Recipe for 50 mL 6x SDS buffer (160 mM TrisHCl pH 6.8, 2% SDS, 200 mM DTT, 40% glycerol, bromophenol blue):

- o 5 mL 1.6M TrisHCl pH 6.8
- o 1gSDS
- o 1.54 g DTT

Add water until 25 mL (MilliQ water) and dissolve

o 20 mL glycerol

Add water until 50 mL (MilliQ water)

Add spatula tip of bromophenol blue

BEFORE STARTING

Perform protein extraction from snap-frozen brain tissue:

- weigh tissue
- add RIPA buffer (see Materials) : 10 X of the weight (40 mg = 400 μ L)
- homogenize samples using sample homogenizer
- sonicate samples at 4 degrees C, 3 times 15 seconds (keep the samples on ice between each sonication)
- centrifuge samples at 6000 g for 10 minutes at 4 degrees C
- collect supernatant and measure protein concentration
- aliquot protein extracts and store at -20 degrees C

Day 1 4h 5m

30m

- Prepare samples for Western blotting :
 - 30 μg proteins in 12 μl of volume (adjust with milliQ water)
 - 2.4 μl of 6X SDS buffer + 10% of β-mercaptoethanol
- 2 Vortex samples and spin down

10m

3 Boil the samples for © 00:10:00 at § 98 °C
