Abstract

This protocol details the procedure for immunohistochemical 3,3'-Diaminobenzidine (DAB) staining for Tyrosine Hydroxilase (TH) of free-floating fixed brain tissue sections using the avidin/biotin ABC complex and the Rabbit Polyclonal Anti-TH NB300-109 (Novus).

This protocol has been tested with free-floating non-human primate (NHP) brain tissue that has been fixed (10% formalin or 4% paraformaldehyde), cryoprotected (sucrose or glycerol gradients), and cryo-sectioned \rightarrow 50 μ m.

Guidelines

This protocol has been optimized for using 6 well tissue culture plates [Falcon, 353046] to react individual sections. You will need **2+ mL** solutions for *each* well plate.

It is recommended to use new culture plates for antibody incubation and discard plates used for DAB. Plates used for other steps can be washed and re-used.

Materials

Tissue:

Brain tissue sections (20 - 50 µm).

Materials/Equipment:

- Tissue culture plates or circular staining nets
- Orbital shaker
- Fume hood
- Nitrile Gloves
- Glass slides (charged or subbed)

Reagents:

- Phosphate-buffered saline (PBS)
- Phosphate-buffered saline (PBS) with 0.2% Triton-X
- Akoya Blocking Reagent Powder (SKU FP1012) to make TNB Blocking Buffer/
- Hydrogen Peroxide: H₂O₂ (3% or 30%)
- Distilled water: dH₂O
- Primary Antibody: Novus Biologicals Tyrosine Hydroxylase (TH) Polyclonal Rabbit.
- Secondary Antibody (to match the host of the primary antibody): biotinylated Goat-Anit Rabbit.
- Normal Serum Blocking Solution (e.g., Normal Goat Serum, S-1000-20)
- Vectastain Elite ABC Peroxidase Kit (Standard) (PK-6100) (Vector Laboratories)
- Vectastain ABC-HRP Kit, Peroxidase (Rabbit IgG) (PK-4001, Vector Laboratories)
- DAB Substrate Kit

Examples:

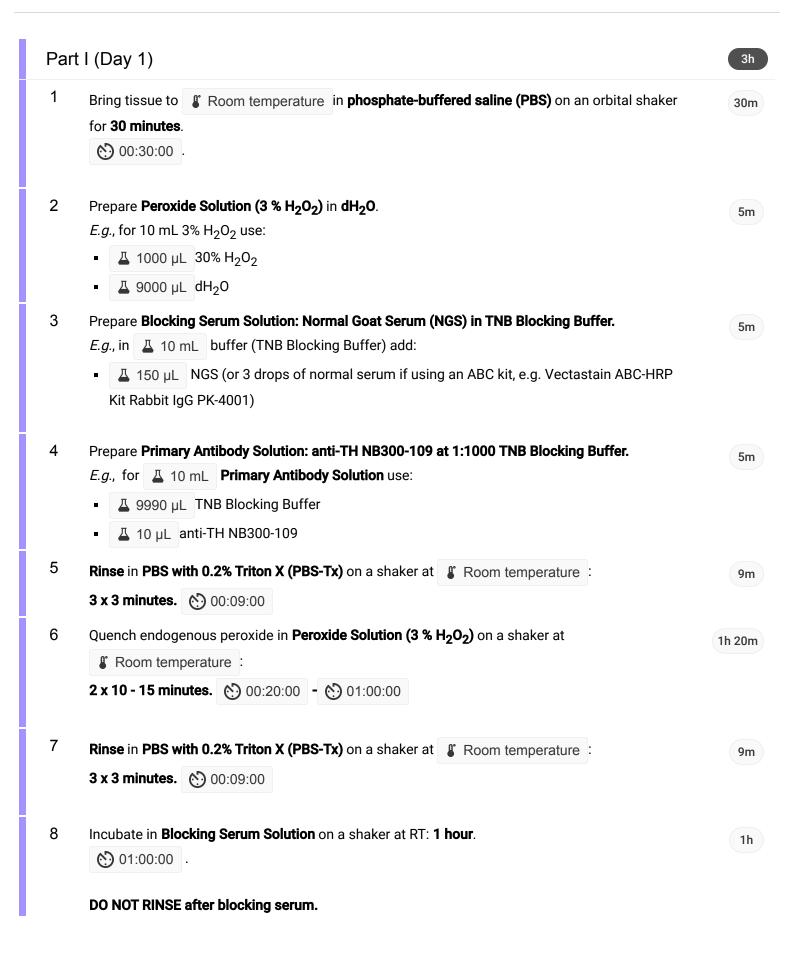

Peroxidase (HRP) with Nickel (3,3'-diaminobenzidine) (SK-4100) (Vector Laboratories) ImmPACT DAB (SK-4105)

Safety warnings

Use appropriate care when using hydrogen peroxide (reactive, can cause skin/eye damage) and DAB (suspected carcinogen). Collect DAB solution for chemical waste disposal.

9 Incubate in **Primary Antibody Solution** on a shaker at 4 °C : **overnight x 3 (60 - 72 hours).** 3d 72:00:00 Part II (Day 2) 4h 10 Bring tissue (in the **Primary Antibody Solution**) to Room temperature on a shaker (45 30m **minutes**). (5) 00:30:00 - (5) 01:00:00 11 Prepare ABC Solution in PBS with 0.2% Triton X (PBS-Tx) (at least 30 minutes before use). 5m **(:)** 00:30:00 . 12 Prepare Secondary Antibody Solution (1:200) in TNB Blocking Buffer. 5m In A 10 mL TNB Blocking Buffer add: Δ 150 μL Normal Goat Serum (NGS) (= 3 drops of normal serum if using an ABC kit, e.g. Vectastain ABC-HRP Kit Rabbit IgG PK-4001). ■ ▲ 50 µL Secondary biotinylated goat-anti rabbit (= 1 drop of normal goat serum if using an ABC kit, e.g. Vectastain ABC-HRP Kit Rabbit IgG PK-4001). 13 Rinse in PBS with 0.2% Triton X (PBS-Tx) on a shaker at Room temperature : 9m **3 x 3 minutes.** (5) 00:09:00 . 14 Incubate in **Secondary Antibody Solution** on a shaker at | Room temperature: 30m **30 minutes.** (5) 00:30:00 15 Rinse in PBS with 0.2% Triton X (PBS-Tx) on a shaker at 🖁 Room temperature : 9m **3 x 3 minutes.** (5) 00:09:00 . 16 Incubate in **ABC Solution** on a shaker at **\(\)** Room temperature : 1h **60 minutes.** (2) 01:00:00 . 17 Rinse in PBS with 0.2% Triton X (PBS-Tx) on a shaker at 🖁 Room temperature : 9m

3 x 3 minutes. (5) 00:09:00 .

18 Prepare **Peroxide Substrate Solution** in dH₂O.

5m

To use the Vector Labs DAB Peroxidase Substrate Kit (SK-4100):

- In \perp 5 mL dH₂0:
- 2 drops Reagent 1
- 4 drops Reagent 2
- 2 drops Reagent 3
- [optional] 2 drops of Reagent 4 (Nickel) if a black reaction product is desired

Note: Mix well before use. Use immediately.

19 Incubate in **Peroxide Substrate Solution on** a shaker at Room temperature:

6m

3 - 10 minutes. (*) 00:03:00 | - (*) 00:06:00 |.

Note: Watch the tissue closely to avoid high background staining.

20 **Rinse** in buffer (e.g. PBS) on a shaker at **\(\)** Room temperature :

9m

3 x 3 minutes. (5) 00:09:00 .

- 21 Mount tissue on glass slides (subbed or charged) in 1:8 PBS in dH₂O and let air dry.
- 22 Rinse slides with dH₂O and let air dry (preferably in a hood).
- 23 Coverslip clean and dry slides with Cytoseal 60 (Thermo Fisher #830-16).
