#### **ABSTRACT**

Digging test optimized for mice. This is a test to assess olfaction impairment. The more olfactory impairment or deficits, the longer it will take to find the sweetened treat.

#### **GUIDELINES**

Note: If the treat was found within 5 mins, the animal was allowed to eat it.

#### **MATERIALS**

- clean mouse cage
- clean bedding
- sweetened cereal. (Cinnamon Toast Crunch)
- stopwatch

Cinnamon Toast Crunch was used here. 4 Bury cereal piece 0.5 cm below the bedding along the perimeter of the cage. 5 Monitor the mouse for 5 mins or until they find the treat. Time was recorded until the treat was found. If treat was not found by the end of 5 mins, mouse does not get the treat. 6 Replace the bedding and repeat for each mouse.
