Keywords: ChIP-Seq, ATAC-Seq, seq data for neuroblastoma cell line, neuroblastoma cell line, epigenomic profiling, cell line, seq data, histone chip, cell growth, seq protocol, myc

Abstract

This protocol explains the process of how we collected MYCN, MYC, and Histone ChIP-Seq data, as well as ATAC-Seq data for neuroblastoma cell lines. This protocol is comprised of three sections: Cell Growth and Expansion for care of neuroblastoma cell lines, ChIP-Seq protocol, and ATAC-Seq Protocol. Table 1, within the document, outlines which data was collected for each cell line.
